

CSS Complete Guide

By Arif Billah Shobuz

Version 1.0 | 2025

CSS Introduction

CSS stands for Cascading Style Sheets. It is used to style and design HTML documents.

How to Add CSS

1. Inline CSS
2. Internal CSS
3. External CSS

Example:

```
<style> p { color: red; } </style>
```

Basic Syntax

```
Selector { property: value; }
```

Selectors

CSS selectors are used to select HTML elements.

Examples:

- Element selector: p
- Class selector: .class
- ID selector: #id

Background Properties

background-color, background-image, background-repeat, background-position,

background-size

Border Properties

border, border-width, border-style, border-color

Border Radius

border-radius: 10px;
